CARRIER OBJECTIVE

Seeking an opportunity to start my career as a Java Developer where I can use my Java, SQL, and problem-solving skills. I am eager to learn new technologies, contribute to the team, and grow with the organization.

PROJECTS

SMART EMAIL ASSISTANT

- Developed an AI-powered Smart Email Assistant using Spring Boot and React for automated email composition and editing.
- Integrated Gemini/OpenAI API to generate professional, concise, and context-aware email responses.
- Designed REST APIs and optimized backend processing to deliver real-time AI-generated email suggestions.

Library Management System

- Developed a library management system for managing books and student records
- Implemented issue/return book functionality using Java and JDBC
- Integrated MySQL database for storing book and user information

EDUCATION

Prof.Ram Meghe Institute of Technology and Research
